Profile Summary

Recent ECE graduate from BVRIT, T.S. aspiring to build a career in Cloud and DevOps engineering. I have a strong foundation in AWS services, automation, and infrastructure deployment, with skills in Terraform, Docker, Kubernetes, Jenkins, and Ansible. Seeking an opportunity in a cloud-focused role where I can apply my skills and grow in a dynamic environment.

Technical Skills

- **Cloud Technologies:** AWS (EC2, S3, IAM, Lambda, CloudWatch, CloudTrail, RDS, Route 53)
- **Infrastructure as Code:** Terraform, AWS CloudFormation, Ansible
- **CI/CD & Automation:** Jenkins
- **Containerization & Orchestration:** Docker, Kubernetes
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux , windows
- **Networking (Basics):** IP Addressing, Subnetting, CIDR, TCP/IP, OSI Model, DNS, HTTP/HTTPS, NAT, Firewalls, Load Balancing, VPC/VNet, Subnets, Route Tables, Security Groups, NACLs, VPN Basics, Cloud Networking (AWS)
- **Monitoring & Logging:** CloudWatch, Prometheus (basics)

Education

B.Tech – (BVRIT (ECE)) CGPA: 7.20	2021 – 2025
Intermediate -(Narayana (MPC)) CGPA:83.2	2019 – 2021
SSC–(SKVHS) CGPA:92.0	2018 – 2019

Projects

1.Title: Hybrid Cloud VPN Setup Between Azure and AWS

Tools Used: Azure VPN Gateway, AWS VPC, Virtual Private Gateway (VPG), Customer Gateway (CGW), Site-to-Site VPN, EC2, Azure VNet, Routing Tables, PSK (Pre-Shared Key)

Description: Designed and implemented a secure Site-to-Site VPN connection between Microsoft Azure and Amazon Web Services using a Hub-and-Spoke architecture. Enabled private communication between Azure VM and AWS EC2 over an encrypted IPsec tunnel, ensuring secure multi-cloud connectivity.

Roles & Responsibilities:

- Configured Azure Hub VNet, Spoke VNet, VPN Gateway, and Local Network Gateway.
- Set up AWS VPC, subnets, routing tables, EC2 instance, Customer Gateway, and Virtual Private Gateway.
- Enabled Hub–Spoke peering with gateway transit for proper routing.
- Tested and verified private IP communication between Azure VM and AWS EC2 securely.

2. Title: AWS 3-Tier Architecture Deployment Using Terraform

Tools Used: terraform, EC2, Amazon RDS (MySQL), S3, IAM, Security Groups, Secrets Manager, VPC, Subnets, Internet Gateway, NAT Gateway, Route Tables

Description: Implemented a secure and scalable 3-tier architecture (Web, App, DB layers) on AWS using Terraform. Used AWS Secrets Manager for secure storage of database credential and configured S3 backend for remote Terraform state management. Applied AWS best practices for networking, access control, and modular IaC deployment.

Roles & Responsibilities:

- Designed VPC with public and private subnets, routing, NAT Gateway, and Security Groups.
- Provisioned EC2 instances for web and application tiers using Terraform modules.
- Created Amazon RDS (MySQL) with secure connectivity from private subnets.
- Configured S3 bucket for Terraform remote backend to store and manage state files.
- Performed end-to-end testing of communication between Web → App → DB tiers

Certifications

- AWS Cloud Practitioner Essentials – VCube Software Solutions Pvt. Ltd.

Achievements

- Published research paper: “Next-Gen Underwater Communication using Li-Fi” — IEEE, 202X.
- Qualified GATE 2024 (ECE).
- Volunteered in multiple events conducted at BVRIT.
- Participated in Arts competitions during B.Tech at BVRIT.
